# Cognos Onsite Training

## IBM Cognos Query Studio

### Intended Audience:

This course is intended for business and professional authors who want to create, modify, and organize ad hoc reports.

IBM Cognos Query Studio is a one-day, instructor-led course designed for business authors who want to learn how to create, modify and organize ad hoc reports. The course covers how to use different report capabilities and the appropriate use of each and how to graphically display the data. The course also covers basic administrative tasks, such as scheduling reports and delivering reports in different formats (HTML, PDF, Excel, etc.).

## IBM Cognos Analysis Studio

### Intended Audience:

This course is intended for business analysts.

IBM Cognos Analysis Studio is a one-day, instructor-led course that teaches business analysts to navigate and analyze data in Analysis Studio. Through a combination of lectures and hands-on workshops, attendees will discover trends, identify opportunities, and make better business decisions. Participants will learn techniques such as ranking, filtering, asymmetrical crosstabs, and graphing to help them analyze large volumes of data (whether OLAP or dimensionally modeled relational metadata). Also included is report management through Cognos Connection.

## IBM Business Insight/ Business Insight Advanced

### Intended Audience:

This course is intended for analysts, business and professional authors who would like to learn this new tool from IBM.

IBM Cognos Business Insight / Business Insight Advanced training is a two-day, instructor-led course that covers developing a reports and analysis via both multidimensional and relational data sources. Also the attendee will be introduced to Business Insight dashboard environment. An introduction to enhancing, customizing, and managing reports. Attendees will learn the report building process and participate in hands-on demos and workshops that illustrate key concepts while learning how to use the product.

# Cognos Onsite Training

## IBM Cognos Report Authoring

**Intended Audience:**

This course is intended for professional report authors.

IBM Cognos Report Authoring is a two-day, instructor-led course that covers an introduction to IBM Cognos Connection, report management through IBM Cognos Connection, basic and intermediate report building techniques, and ways of enhancing, customizing, and managing professional reports in Report Studio. Attendees will learn the report building process and participate in hands-on demos and workshops that illustrate key concepts while learning how to use the product.

## IBM Cognos Advanced Report Authoring

**Intended Audience:**

This course is intended for professional authors.

IBM Cognos Advanced Report Authoring is a three-day, instructor-led course designed for professional report authors. Through hands-on workshops, you will learn advanced techniques for creating, modifying, and distributing professional reports using Report Studio and IBM Cognos Connection. In particular, you will examine and create query models, burst reports, examine and create Active Reports, examine and set up an external data source access, set up drill-through access, and author advanced reports. You will also learn to manage an event in Event Studio. This includes managing the task execution rules, creating a schedule for an agent, and working with agents in IBM Cognos Connection.

## Cognos BI Administration

**Intended Audience:**

This course is intended for models and administrators.

IBM Cognos BI Administration is a 2-day, instructor-led course that is designed to teach new administrators the fundamental responsibilities of administering servers and content in IBM Cognos BI. Through a combination of lectures and hands-on exercises, students will set up the IBM Cognos BI system, implement security, and manage the server components. Students will also monitor and schedule tasks, create data sources, manage and deploy content, manage content in IBM Cognos Connection, and configure IBM Cognos GO! Office.

## Cognos 5-day Boot camp

**Intended Audience:**

This course is intended for models and administrators.

New England Systems 5-day Boot camp is an A to Z introduction to IBM Cognos 10. Attendees will be introduced to both relational and multidimensional modeling, to report authoring focusing primarily on Report Studio techniques, to Business Insight Advanced and Business Insight dashboards, to administrative tasks such as security, portal management, scheduling, mashup services, portlets, Event Studio agents, Watch lists and many other options available inside IBM Cognos 10.

## IBM Cognos Transformer

**Intended Audience:**

This course is intended for data architects and database administrators.

IBM Cognos BI Transformer: Design Multidimensional Models (v10.1) is a 2-day, instructor-led course that provides participants with introductory to advanced knowledge of multidimensional modeling concepts, and how to model multidimensional for predictable reporting and analysis results using Transformer. Participants will learn the full scope of the multidimensional modeling process, from initial project creation, to publishing of metadata to the Web, enabling end users to easily author reports and analyze data.

## IBM Cognos Framework Manager

**Intended Audience:**

This course is intended for data architects and database administrators.

IBM Cognos BI Framework Manager: Design Metadata Models (v10.1) is a 3-day, instructor-led course that provides participants with introductory to advanced knowledge of metadata modeling concepts, and how to model metadata for predictable reporting and analysis results using Framework Manager. Participants will learn the full scope of the metadata modeling process, from initial project creation, to publishing of metadata to the Web, enabling end users to easily author reports and analyze data.
